○ International Locations   [Welcome Gifts ▼]   in   [All Locations ▼]   [Filter]

Filter 2.4   Regardless of user choice of location groups (US/Int'l), Category or Location, user is displayed Category Grid

◉ US Locations   Select Category   Select Location

○ International Locations   [Welcome Gifts ▼]   in   [All Locations ▼]   [Filter]   [**Grid**]   [List]

Showing 17 locations with Welcome Gifts.

Location Name #1

Vendor Name	Vendor Name	Vendor Name

Location Name #2

Vendor Name	Vendor Name	Vendor Name

Filter 2.5   The remaining workflows for this type of filter component would remain the same. Whenever a user updated their Category select, it would repopulate the Locations, requiring the user to activate the filter. If the user switched the US/Int'l designation, the Category and Locations selects would return to their default settings and the user would once again have to select a Category, Location and then filter.
